Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4-7 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hammarberg'519 et al.

The Hammarberg et al. reference discloses a device/kit for refilling an implantable pump 4 comprising a first syringe 18, a second syringe 16, a three-way valve or stopcock 20 and a filling needle.

In regard to claim 4, the second syringe 16 further reserves as a collection syringe when the system is in a rinse mode of operation (see col. 5, lines 54-65).

In regard to claim 5, the piston or actuating rod 36 includes an implied stopper or piston in order to facilitate operation of the syringe.

In regard to claim 11, the method as claimed would be inherent during normal use and operation of the device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3751

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hammarberg'519 et al.

The Hammarberg et al. reference discloses a pump refilling apparatus (*supra*), but is silent as to the capacity of first and second syringes (i.e. 50 ml and 10 ml respectively). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the first and second syringes be 50 ml and 10 ml in capacity (if not already), since it has been held that where discovering an optimum amount or value involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

Allowable Subject Matter

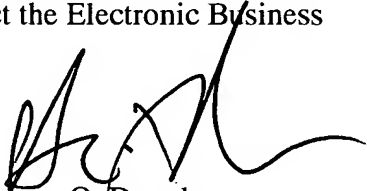

Claims 12-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
